### **DETAILED ACTION**

This action is in response to Applicant's amendment filed on 06/26/2007. **Claims 1-17 and 21 have been cancelled. Objected claim 18 has been amended to the independent form by incorporating all the limitations of its independent claim 11 and dependent claim 17. Dependent claims 19 and 20 are as previously presented. Claims 18-20 are now pending in the present application.**

#### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Henry Brendzel, registration number 26,844, on 8/27/2007, and confirmed by an e-mail sent to the examiner.

The claims have been amended as follows:

***Claim Listing***

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. – 17. (Canceled)

18. (Currently Amended) A method executed in an arrangement including a network that supports assigning systems to specified VPNs, which systems connect to edge routers of the network, which network includes collection, comprising one or more devices, that operates to insure that systems A and B of said systems that are each assigned to one or more VPNs but which have no commonly assigned VPN cannot communicate with each other, comprising the steps of:

receiving a message from an application of a type for which inter-VPN communication is allowed, indicating a desire to establish communication between said systems A and B; directing said collection to install a modification having whose effect is to allow communication between said systems A and B; and directing said collection to remove said modification at a later time to reinstate prohibition against communication between said systems A and B;

where said directing said collection to install a modification comprises a step of installing an entry in a VPN route and forward (VRF) table that is associated with edge router A of said edge routes through which said System A is coupled to said network, and installing an entry in a VRF table that is associated with edge router B of said edge routes through which said system B is coupled to said network; and

~~The method of claim 17~~ where said entry that is installed in said VRF associated with

Art Unit: 2143

said edge router A comprises an indication that system B belongs to a VPN to which system A belongs, and said entry that is installed in said VRF associated with said edge router B comprises an indication that system A belongs to a VPN to which system B belongs.

19. (Previously Presented) The method of claim 18 where said entry that is installed in said VRF associated with said edge router A further comprises a route indication for reaching system B, and said entry that is installed in said VRF associated with said edge router B further comprises a route indication for reaching system A.

20. (Previously Presented) The method of claim 18 where said entry that is installed in said VRF associated with said edge router A further comprises a route criterion for limiting traffic that is destined to system B solely to traffic that pertains to said application.

21. (Canceled)

***Allowable Subject Matter***

**Claims 18-20** are allowed.

The following is an examiner's statement for reasons for allowance:

Consider **claim 18**, the best prior art found during the examination of the present application, **Chantrain et al. (U.S. Patent Application Publication # 2002/0002687 A1)** in view of **Chu et al. (U.S. Patent Application Publication # 2004/0255028 A1)**, and further in view of **Salama (U.S. Patent Publication # 7,120,682 B1)**, fail to specifically disclose the limitation of the method of arrangement of VPNs in a network, where said entry that is installed in said VRF associated with said edge router A comprises an indication that system B belongs to a VPN to which system A belongs, and said entry that is installed in said VRF associated with said edge router B comprises an indication that system A belongs to a VPN to which system B belongs.

Additional search after the non-final office action, and the subsequent review of the found references {Moberg et al. (US 7,185,106 B1); Akhtar et al. (US 7,079,499 B1); Dantu et al. (US 6,532,088 B1); McDysan (US 2004/0208122 A1); and Rosen et al. (US 2003/0016672 A1) did not reveal the inventive concept of the amended claim 18.

Therefore **claim 18** is considered novel and non-obvious.

**Claims 19 and 20** are allowed because of their dependency on allowable independent **claim 18**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
